

Cannabis Equity Verification Program

Creative Services, Inc. (CSI) is known for its **accurate** screening services with a **time proven methodology** using **state of the art technology**. In today's evolving cannabis industry, Regulators and Cannabis Boards are being called to implement laws related to cannabis legalization. The responsibility of issuing licenses in a fair and equitable manner requires diligence and careful validation in a way that promotes the mission to support those who have been disproportionately impacted by the different aspects of cannabis. CSI works directly with Cannabis Commissions and State Agencies to validate the social equity eligibility criteria by providing criminal background screening, residential address verification and military service history to use in conjunction with existing methods to confidently determine **equity license holders'** suitability.
