

Chair Statement Before Hearing Public Testimony

Let me say a few words before we begin the public testimony portion of our meeting. The Council truly appreciates comments from the public and we thank you for coming today.

We value your input and will listen carefully to everyone who comes before us. Please note that Council members may not always respond directly to comments. We may follow up with questions to make sure we understand, but typically we do not consider any action at this time. If we think future action may be needed, we will ask staff to follow up, to conduct any necessary research, and to report back to the Council about possible actions at a future meeting.
